

JACARANDA HEALTHCARE

passionate proven practical professional

JACARANDA HEALTHCARE

“Quality in Care” is the foundation of Jacaranda Healthcare. We partner with organisations to help improve their care standards. We thrive on helping the less visible areas of healthcare. Jacaranda Healthcare provides a team of dedicated professionals who possess firsthand experience in improving clinical and operational outcomes in a variety of healthcare settings. This experience includes areas such as developing nations, rural and remote healthcare and aged and community care.

Products and services provided by Jacaranda Healthcare include the effective use of information technology whilst optimising business management. Our products use innovation, flexibility and experience to ensure they exceed our partners’ requirements.

The management team at Jacaranda Healthcare has extensive clinical experience with in-depth knowledge of healthcare strategy, planning, and operations.

Jacaranda Healthcare Advocacy Statement
Jacaranda Healthcare advocates effective adoption of technologies to ensure optimal healthcare outcomes.

JACARANDA HEALTHCARE PRODUCTS

SATURN

Jacaranda is the Australian and New Zealand distributor for Saturn (from Cerrus Ltd UK), one of the most widely used Social Health software applications in Europe with over 2000 clients and 35,000 users.

Saturn provides a care and support management and reporting system for residential aged care homes and domiciliary care that:

- Greatly reduces administration time by removing substantial requirements for paperwork.
- Improves efficiency in managing the provision, costing and resourcing of care services.
- Allows for the tracking of trends, analysis and statistics from head office.

GEMIS

GeMIS provides an information portal that delivers key a wealth of valuable insights via a series of executive dashboards and complex data-mining reports to help senior executives make better informed business decisions.

Designed specifically for CEOs, Directors and Managers of Health, Finance, HR, Care and Operations, GeMIS provides the basis for delivering valuable information to executive management teams, government departments and ministries of health and social care.

- GEMIS can be used to provide business critical information at a local, regional or national level - delivering clear visibility of key performance indicators (KPIs), quality processes and outcome measures.

BIZBOX HOSPITAL AND CLINIC SYSTEM

Jacaranda is the Australian and South East Asia distributor for BizBox Hospital and Clinic Systems, one of the most widely used Health Information Systems in the Philippines. After 15 years of development this fully integrated system supports over 140 clinics and hospitals anywhere from 6 to 600 beds.

BizBox provides a fully integrated solution capable of managing:

- Patient administration
- Seamless access to data across all hospital departments
- Ordering and reporting
- Inventory management
- Automated billing
- Accounts

Jacaranda has successfully implemented the BizBox Hospital and Clinic system into a large private healthcare organisation. This is the first Health Information System to have been installed into Papua New Guinea.
